Intact Platform Integration

The Intact Platform is the leading cloud and on-premise Enterprise Resource Planning (ERP) solution for audit, assessment, certification, accreditation, and standards management.

Intact BI integrates Tableau dashboards with the Intact Platform for anytime, anywhere monitoring of business insights and benchmarks. No additional Tableau user or maintenance fees. Intact configuration gives you immediate insights to bring visibility to performance. Integrate other external data sources and customize your dashboards. Users can set automatically generated reports, alarms, and notifications, and can highlight, filter, and share data.
